## MODERN BIOTECHNOLOGY: TRENDS AND PRINCIPLES

2004. Hardcover. Book Condition: New. 310 Biotechnology is the term for a group of technologies that pursue the understanding and use of organisms and biological processes for health, social, environmental or economic applications or outcomes. Modern biotechnology includes techniques ranging from molecular and cellular biology, biochemistry and immunology through to biological applications of information technology. The present book provides an in-depth analysis of the trends and principles of modern biotechnology. Researchers, academics, scientists, policy-planners and administrators will find this work...
