

## Eight Lectures on Theoretical Physics; Delivered at Columbia University in 1909 Volume 6 (Paperback)

Filesize: 8.12 MB

### ***Reviews***

*This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.*

*(Rene Olson)*

## EIGHT LECTURES ON THEORETICAL PHYSICS; DELIVERED AT COLUMBIA UNIVERSITY IN 1909 VOLUME 6 (PAPERBACK)

Theclassics.us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 edition. Excerpt: .place of the three velocities  $W_1$ ,  $p_2$ ,  $p_3$ , as the determining coordinates of the state. These are defined in the following way: wherein  $H$  denotes the kinetic potential (Helmholz). Then, in Hamiltonian form, the equations of motion are:  $\frac{d}{dt}x = \frac{\partial H}{\partial p_x}$  ( $H$  is the energy), and from these equations follows the condition of incompressibility  $\frac{d}{dt} \frac{d^2x}{dt^2} = 0$  Referring to the six-dimensional space represented by the coordinates  $p_1$ ,  $(2, p_2, \dots, p_6$ , this equation states that the magnitude of an arbitrarily chosen state domain, viz.:  $J \frac{d^2x}{dt^2} \frac{d^2y}{dt^2} \frac{d^2z}{dt^2} \frac{d^2p_1}{dt^2} \frac{d^2p_2}{dt^2} \frac{d^2p_3}{dt^2}$ , does not change with the time, when each point of the domain changes its position in accordance with the laws of motion of material points. Accordingly, it is made possible to take the magnitude of this domain as a direct measure for the probability that the state point falls within the domain. From the last expression, which can be easily generalized for the case of an arbitrary number of variables, we shall calculate later the probability of a thermodynamic state, for the case of radiant energy as well as that for material substances. **FOURTH LECTURE. The Equation Of State for A Monatomic Gas.** My problem today is to utilize the general fundamental laws concerning the concept of irreversibility, which we established in the lecture of yesterday, in the solution of a definite problem: the calculation of the entropy of an ideal monatomic gas in a given state,...
