

Report of the State Mineralogist Volume 12

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 278 pages. Dimensions: 9.7in. x 7.4in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 edition. Excerpt: . . . steel cams, shoes, and dies; the life of the shoes is 90 days, with a duty of 21 tons per stamp per day when working at 90 drops per minute, with 3 to 5 in. drop, and 6 in. discharge, through a No. 35 slot-cut Russian iron screen. The batteries are provided with front and back inside plates, and 4 by 12 ft. aprons, set on a 11 in. grade to-the foot. The aprons, scraped daily, yield an equal amount of amalgam with the batteries. Cyanide of potassium solution and lye are used in the batteries and on the plates. Four Frue vanners save the sulphurets. The mill, when running, consumes 4 cords of wood per day (pine and oak), at a cost of 4 per cord. Timbers are delivered at 6 cents per running foot. The timbers in the mine do not last...
