Neuware - This study reviewed differences in family backgrounds of pupils against their academic performance in Ibadan North-East municipality of Ibadan, Nigeria. A total of two hundred and twenty pupils between the ages of 10 to 15 in junior secondary schools were sampled, N=220 and 8 teachers were interviewed. Study revealed that no significant differences existed in the pupils' levels of academic attainment and ethnic background, while a significant difference was found between the monogamous and polygamous pupils' religions across the various family structures observed.
