

Struktur und Innervation des juxtaglomerulären Apparates der Ratte / Structure and Innervation of the Juxtaglomerular Apparatus of the Rat

Filesize: 2.07 MB

Reviews

It is an awesome book that we have possibly go through. It is actually written in straightforward words and phrases and not confusing. It is extremely difficult to leave it before concluding, once you begin to read the book.

STRUKTUR UND INNERVATION DES JUXTAGLOMERULÄREN APPARATES DER RATTE / STRUCTURE AND INNERVATION OF THE JUXTAGLOMERULAR APPARATUS OF THE RAT

Springer Apr 1978, 1978. Taschenbuch. Book Condition: Neu. 235x155x5 mm. This item is printed on demand - Print on Demand Neuware - The structure and innervation of the juxtaglomerular apparatus are examined by both light and electron microscopy, using series of semithin and thin sections. At the vascular pole of the renal corpuscle, granulated and nongranulated epithelioid cells, Goormaghtigh's cells and mesangial cells, as well as adjacent smooth muscle cells, are all connected to each other. Due to their fine structure, their topographical continuity, and the numerous gradual stages of transformation, the different components of the vascular wall are defined as ramified smooth muscle cells (epithelioid cells), which are separated from typical smooth muscle cells of glomerular arterioles. The modified smooth muscle cells show not only numerous cytoplasmic processes, but also many plasmalemmal infoldings. In some areas, these exhibit a spiny differentiation similar to that of coated vesicles. Particles of condensed material resembling basal lamina are often found in the tubular and lamellar indentations of granulated epithelioid cells. The mechanism of release of secretory granules and the mode of secretion via coated vesicles is discussed. Using exogenous protein horseradish peroxidase to mark the extracellular space, gap junctions between all types of cells of the vascular wall may be seen. The functional significance of an electrotonically coupled cell group and the role of the epithelioid cells as stretch receptors and pace-maker elements, respectively, is discussed in connection with the autoregulation of the nephron. 84 pp. Englisch, Deutsch.
